VIIAD WELCOMES MEDMETRICS Partners with Workers' Compensation Analytics Leader

Langhorne, PA - April 13, 2015- [VIIAD Systems](#), LLC a provider of web-based solutions for the healthcare and workers' compensation marketplace, announced continued strong momentum with the addition of a new partnership with, MedMetrics®, LLC, a Workers' Compensation Medical Analytics company.

Continuing with both companies' visions of providing innovative products and solutions to the workers compensation industry, VIIAD and MedMetrics have teamed up to make analytic medical provider performance data actionable.

"With the combination of VIIAD's provider directory and worksite poster tool and MedMetrics Medical Provider Performance Analysis product, the workers compensation marketplace can search and utilize scored providers in the production of panel cards, worksite posters, and on line provider directory searches, said April Stiles, VIIAD COO.

The partnership between the two companies will provide employers and payers with quality medical provider scoring to insure their injured workers better medical care and improved outcomes, and employers with reduced costs, said Karen Wolfe, MedMetrics, President.

"VIIAD is continually honing and expanding our solutions to meet our industries' requirements and provide our clients with a competitive edge," stated [John Zubak](#), VIIAD CEO"

About MedMetrics

MedMetrics® is a Workers' Compensation medical analytics and technical services company that links analytics to operations through online apps. The underlying philosophy of MedMetrics® is that existing data can be knowledgeably integrated and analyzed using new and advanced approaches to expand Workers' Compensation medical management intelligence. Our goals are to identify best medical practices, monitor the treatment process, uncover medical cost drivers, and deliver alerts to expedite early and effective medical management intervention.
